

DevNotes

Music Mixer | Multimedia-Authoring 2

Concept is to make use of c4d for to make animations for the MM background or Icons. Animations will mostly be done with spriteSheets.

Options

- + Responsive layout.
- + Character info lightbox
- + Add micro-interactions
- + Use drag direction

+ Research forms of 3d video filters (red-green phase and google-cardboard).

Plan

1. Html scaffold (Try to start responsive)
2. JS - Drag & drop controls as well as any lightbox or micro-interactions.
3. Mess around with CSS-animations
4. Test

Scaffolding

Drafts

JS DevLog

Nothing too new technically.

Drag & Drop

Micro-Interactions

3D icons – hover } buildout complete.

LightBox

Responsive-Layout

Icon tray – basic } buildout complete.
